Allen-Bradley PowerFlex DC VSD IP20 480V AC 3Phase 129A 75HP

LARGE DRIVES

Component type	Frequency converter =< 1 kV
Range	PowerFlex DC
Model	N/A
Product status	Phased Out

The Allen-Bradley PowerFlex range of DC drives deliver precise and reliable control of DC motors, with a wide range of power ratings and advanced features for applications that require high performance. Able to meet the requirements of various demanding applications including DC motor applications and retrofits while ensuring easy drive configuration.

ELECTRICAL	Number of phases input	3
	Nominal output current I2N	129 A
	4-quadrant operation possible	Yes
CONSTRUCTION	Frame size	A
	IP rating	IP20
