L1C110VD

Microelettrica Contactor Coil for LTN60 and LTHS60 1Pole NO 110VDC

ELECTRICAL ENGINEERING PRODUCTS

Component type	Coil for relay
Range	Contactor
Model	N/A
Product status	Existing

The Microelettrica contactors are designed for railway rolling stock and fixed applications offering high reliability and low maintenance. High performance is achieved through a strongly optimised design, ensuring a robust dimensioning of components with reduced weight and cost savings while fully containing the electric arc inside the arc-chute.

ELECTRICAL

Voltage type for actuating	DC
Control supply voltage Us at DC	110 V
