

Parts Management Agreement

A flexible, easy to use, vendor managed inventory program

A management plan that provides spare parts and services to meet your maintenance and repair operation requirements.

With a Parts Management Agreement NHP supplies and manages your spare parts inventory. Your cost is a fixed monthly or quarterly amount for managing the inventory. The total cost is usually less than your current combined costs of floor space, property taxes, spoilage, management, insurance, and spare parts purchases.

Reduce Downtime Duration

Factory sealed inventory, dedicated to you and located at your site, available 24*7*365

Flexible Inventory

Holding in stock only what you need avoids a build-up of obsolete products, making way for the critical parts you need.

Cost Savings

Convenient monthly or quarterly payment plans help stabilise budgets, and may also be fully tax deductible.

Peace of mind

Quarterly audit and review meeting keeps your inventory aligned to your plant, and In-Service Warranty further drives cost savings.
