| Component type | Multifunction energy meter |
| Range | EM24DIN |
| Model | N/A |
| Product status | Existing |

The NMI pattern approved EM24DIN energy meter is ideal for commercial applications where energy management, NABERS, and/or Green Star are key requirements. The versatile three-phase energy meter features on board MODBUS communications where energy data can be remotely available and accessible to energy management systems. For added application flexibility, the EM24DIN energy meter can be used either as a DIN-rail mounting or a panel mounting energy meter with purpose-fit accessory. Three digital inputs are also available for tariff selection or gas and water metering.
