# Ethernet and Serial Gateway Solutions

ProSoft Technology's stand-alone, DIN rail-mounted industrial gateways provide a means to read or write data from devices using dissimilar protocols. All gateways come with our ProSoft Discovery Service feature. With PDS, you don't have to change your PC to the default subnet of the module, saving you time during setup.

Building Automation solutions – including QuickServer gateways – bring key operational data directly to your Rockwell Automation controller. Use these solutions to boost energy efficiency, use the resource most productively, and decrease your usage and costs.

- Gateways with two Ethernet ports allow you to isolate networks, passing only the data you want between devices
- EtherNet/IP™ gateways support multiple I/O connections for fast real-time data
- Remote configuration and diagnostics via Ethernet
- SD Card slot for disaster recovery of configuration data
- Up to four Serial ports

**PROFIBUS DP & many other protocols are also available.**

## Automotive and Inertial Navigation Gateways

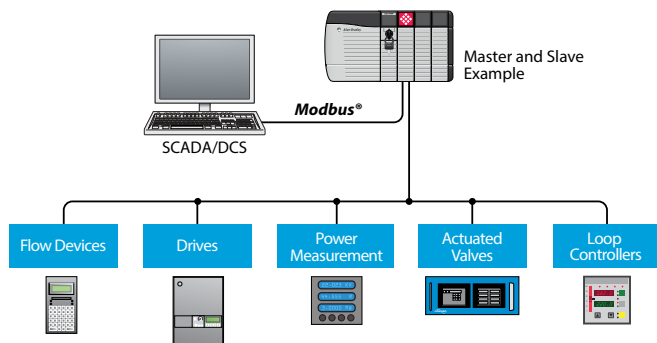

- The **CANOpen Router** is an ideal solution for motion-oriented machine control systems, primarily in automotive applications. The module supports EtherNet/IP to CANOpen communications, and can support either Master or Slave mode.
- The **J1939 Router** enables automotive diagnostic communications via EtherNet/IP between Logix controllers and J1939 devices. The module is used to facilitate automatic unpacking and scaling of J1939 devices' data to your controller's UDT structure, saving you time.
- The **Time Sync Module** enables precise time syncing with Logix controllers and HMIs, and provides GPS data as well for inertial navigation applications. Velocity and odometer data is available thanks to the onboard GPS receiver.
- The **XPosition Module** delivers highly precise location data from GPS or inertial navigation devices, ensuring you know the placement of your crane system, marine crafts, or drilling equipment.

# Serial & Ethernet Modbus® Solutions

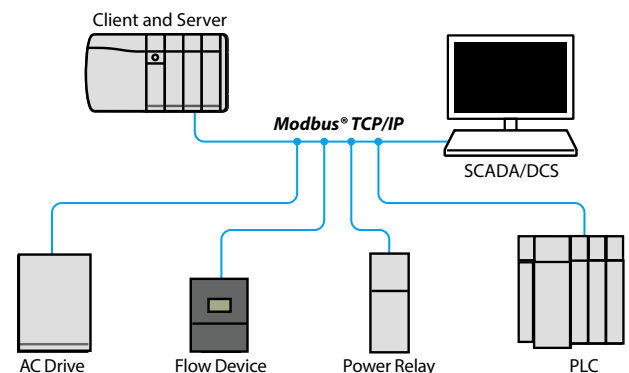

## Modbus® Serial

- Module configuration stored within the Studio 5000®/RSLogix™ 5000 project (ACD file) for simplified disaster recovery
- Add-On Profile (AOP) improves integration into Studio 5000/RSLogix 5000
- Add-On Instruction (AOI) reduces configuration effort and simplifies maintenance
- Modules also available for the Logix-XT platform; support operations in extreme environments at higher operating temperatures, and have a conformal coating to protect them in harsh conditions

## Modbus® TCP/IP

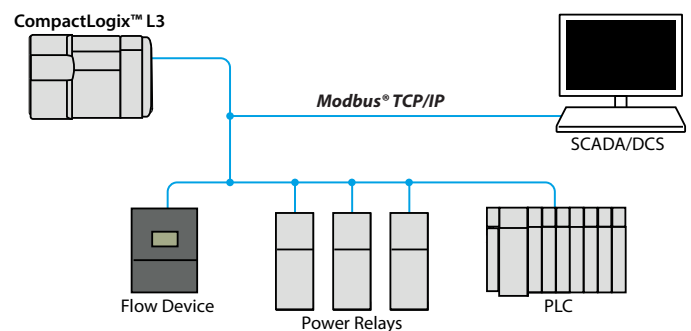

- Fast Multi-Server/Multi-Client capabilities
- Add-On Instruction reduces configuration effort and simplifies maintenance

## Scalable Modbus® & Modbus® TCP Solutions for CompactLogix™

- Enhanced modules allow up to 10,000 I/O words
- Lite modules allow up to 240 I/O words
- Integrated Modbus® Serial communications in 1734 Point I/O™ applications

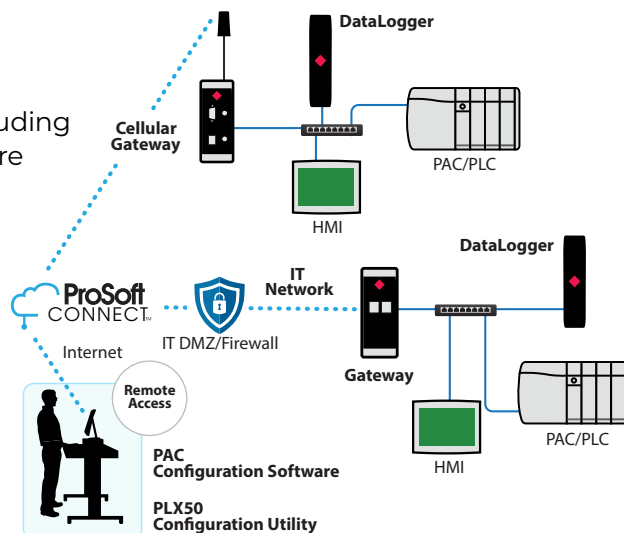

# Secure Remote Connectivity

ProSoft's Secure Remote Access suite, easy to use by design, provides IT-secure and OT-friendly solutions that help you connect to your equipment anywhere, at any time. Remote access gateways and always-on networks can be monitored securely and easily in ProSoft Connect, our cloud-native service.

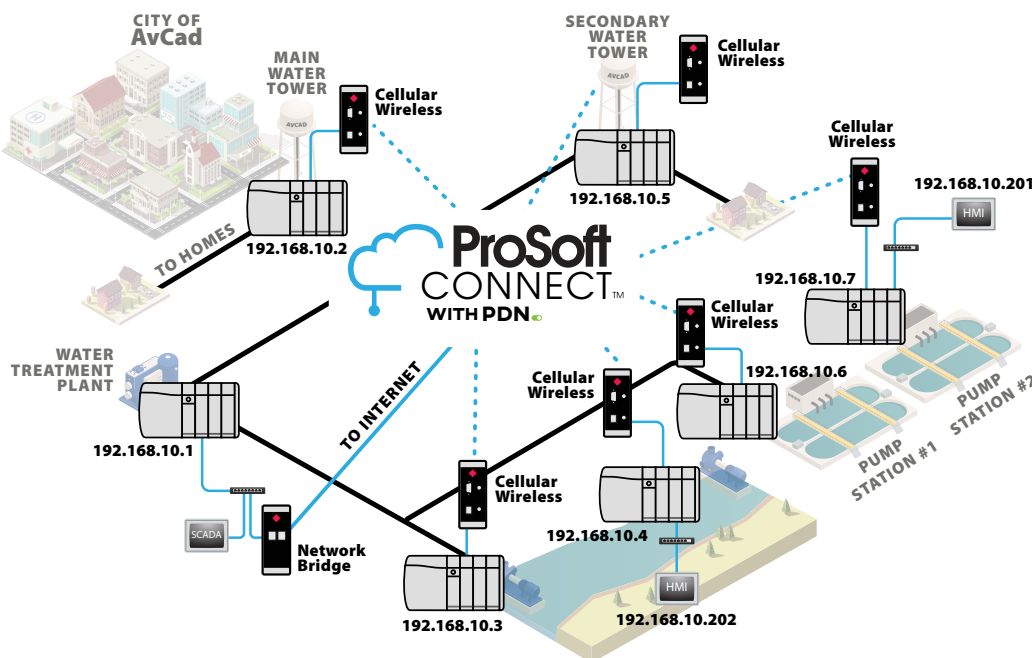

We aim to make remote access as secure and streamlined as possible, and put the end user in the driver's seat, ensuring complete access control of remote equipment. Our remote access solutions feature:

- Virtual Lockout-Tagout feature for greater access control of specific equipment
- A multi-layered Defense-in-Depth approach to security, including advanced two-factor authentication (we avoid the less-secure SMS mode of authentication) and Active Directory support via Single Sign-On (SSO), which means you can access ProSoft Connect with your corporate login credentials
- Role-based device and user access
- No software updates on your part – no user-installed software means you'll eliminate an entry point for hackers, and save time for your team
- OpenVPN support: One-time-use tunnels provide a secure connection between your equipment and ProSoft Connect
- Layer 2 Tunneling Protocol (L2TP)/IPSec and Secure Socket Tunneling Protocol (SSTP) support increases VPN security for all popular clients, including Windows, iOS, and Android products, and easily allows you to see your remote devices rather than try to remember them
- Support for SMS messaging from your EtherNet/IP or Modbus TCP/IP PAC (Cellular Gateway only)

## Persistent Data Network (PDN) Always-on, secure, and managed cloud-based network to connect geographically dispersed remote sites.

This simple, secure solution is ideal for infrastructure communications networks.

## Gateways

### Industrial Cellular Gateway (ICX35-HWC)

- 4G LTE cellular or wired access via WAN/LAN port
- Ethernet port available for Internet connection or SIM card
- Monitor and manage via ProSoft Connect

### Network Bridge (PLX35-NB2)

- Wired remote access
- Monitor and manage via ProSoft Connect
- Enable / Disable remote access locally via an EtherNet/IP message
- File Relay – transfer files across segmented networks

### Data Logger Plus (PLX51-DLplus-232)

- Ideal for remote sites with limited communications that need to log data (stores over 16M records!)
- Can help OEMs identify operational issues and improve OEE
- Data can be downloaded as a .csv file
- Support for 200 tags; minimum log interval: 50 milliseconds
- Features support for JSON interface, enabling easy exporting of logged data to business CRM systems
- Features an integrated webserver to trend variables and upload logged data
- XLReporter connection available

## ProSoft Connect Platform

- EasyBridge™ technology enables your PC to act like it is connected directly to a switch on the remote network
- Allows software tools, such as RSWho and Studio 5000, to work without routing
- Multi-layered defense-in-depth approach, including support for Active Directory (SSO) and token-based 2F Authentication, keeps your data and equipment safe

### ProSoft Connect Lite App

What if you're not at your desk or office when the customer call comes in, or sitting on a beach and your customer calls with a critical issue? You don't have to give up that view or worry you'll upset your customer - ProSoft Connect has gone mobile, and the app is available to download on the iOS or Android platform!

# In-Chassis Flow Computer Solutions

Before

After

ControlLogix®

CompactLogix™

## For Multi-Well Pad and LACT Applications

- Supports 8-16 meter runs with 4 streams per meter run for the measurement of hydrocarbon gases and liquids
- In-chassis solution brings data directly into your ControlLogix® or CompactLogix™; helps minimize cabinet space
- Pair with Rockwell Automation's distributed I/O capability + ProSoft's wireless radios to reduce wiring to transmitters and I/O devices
- Includes the use of EAFC Manager, a free Windows 7-based tool for configuration, reporting, and monitoring; hourly or daily archives with user-selected data are available
- NMI certified for OIIML, WELMEC, and MID type approval (AGA/API)
- No additional licensing fee for liquid meter runs
- Add another AFC card in same chassis if more meter runs are required
- Secure data archiving / meter run
- Archive records stored in non-volatile memory in module
- Archive data cannot be altered/changed
- Integration to SCADA with Modbus/Enron Modbus support (Cygnit, Autosol, and FlowCal)
- System designs can support more than 80 metering locations

**Case Study:** ProSoft's integrated flow computer helped Pelican Gathering decrease the number of components, minimize their panel space, and streamline integration. [psft.com/DCE](http://psft.com/DCE)

## HART Solutions

Gain additional diagnostic information from your distributed process equipment – and boost efficiency as a result.

Point to Point—Modbus/TCP, DNP3 (TCP/IP and UDP), EtherNet/IP  
Point to Multipoint—EtherNet/IP, Modbus/TCP

Find out how you'll benefit  
[psft.com/DCB](http://psft.com/DCB)

## Power and Energy Solutions

Connecting your Rockwell Automation controller to intelligent electronic devices (IEDs), including substation power monitors and relays.

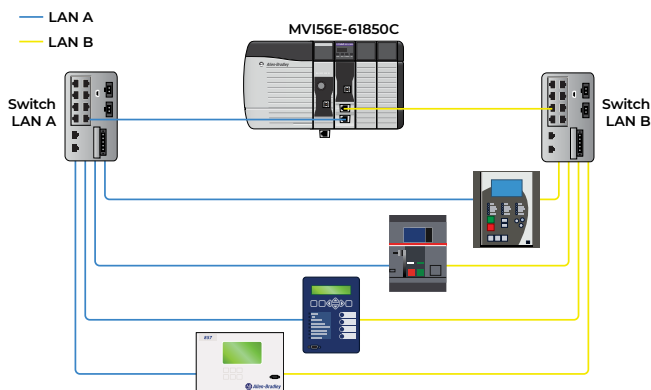

Those devices' data can then be used for IED integration and substation automation, as well as be sent to the utility enterprise level. ProSoft has a variety of modules that can help you extend your power and energy application's Connected Enterprise.

### IEC 61850 Solutions

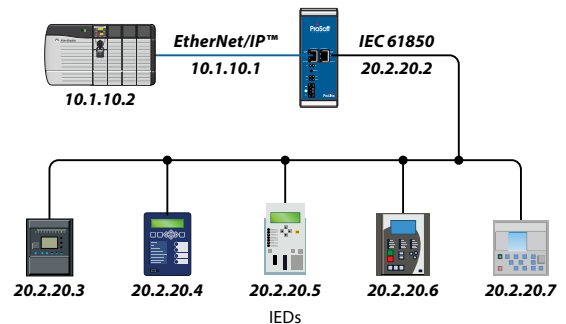

#### IEC 61850 Client Module

- Allows ControlLogix® PACs to interface with IEC 61850 IEDs, including power protection equipment; features support for up to 40 IEC 61850 Server devices on the network
- Supports up to 225 I/O connections to ControlLogix PAC
- Supports MMS and GOOSE messaging, helping you eliminate hard-wired I/O signals for interlocking of protection relays and load shedding applications
- Streamlined configuration: Highly integrated into Studio 5000 with Add-On Profile; custom Add-On Instruction available
- An IEC 61850 Server Module is also available for ControlLogix PACs.

#### IEC 61850 Gateway

- Fast, real-time data transfers with a maximum of 10,000 bytes in and 9,920 out (PLX82)
- Polls up to 20 IEC 61850 server devices
- Application-specific Add-On Instructions are automatically generated
- IEC 61850 IED tags are created in your Studio 5000®/RSLogix 5000™ Project, reducing configuration time and errors

Other protocol solutions are available, including modules supporting IEC-60870-5-101/103/104, Modbus, PROFIBUS, and PROFINET.

## DNP3 Solutions

Connect power and energy, oil and gas, or water and wastewater sites with industrial DNP3 solutions.

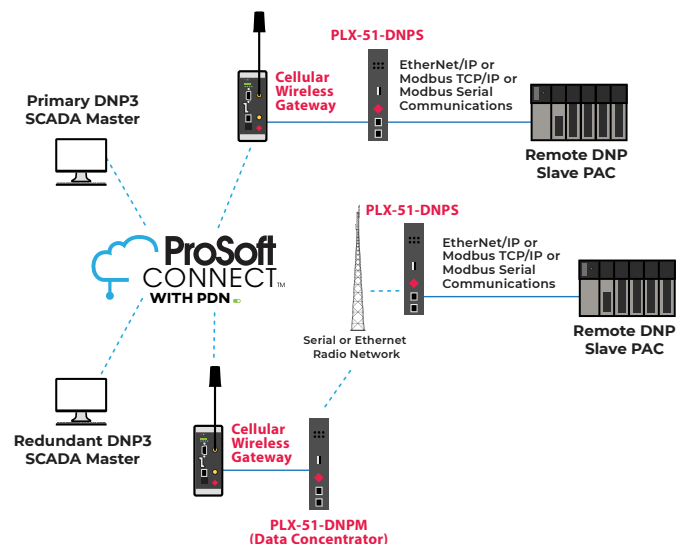

### DNP3 Master and Slave Gateways

The PLX51-DNPM and -DNPS gateways enable intelligent routing between DNP3 and EtherNet/IP or Modbus protocols. Adding these modules into your SCADA and telemetry system will help you reliably capture key data with no holes, with time- and date-stamped data at the source.

- Supports secure authentication
- Optimized for Rockwell Automation architectures
- Flexible and easy to configure

PLX51-DNPM In Data Concentrator Mode with ProSoft PDN

Other DNP3 modules are also available.

# Modernization Solutions

Lower-risk, phased updates of legacy equipment can be completed on your timeline – without using up CapEx. Avoid extended downtime with this gradual approach.

## Legacy Rockwell Remote I/O and DH+™ Modernization Solutions

Modernize your legacy control system in phases with OpEx dollars

### AN-X2-AB-DHRIO EtherNet/IP to Remote I/O or DH+ Gateway

- Replace old Remote I/O drives with new drives on EtherNet/IP without modifying PLC code
- Replace PanelView™ units on Remote I/O to new PanelView Plus 6 models on EtherNet/IP without modifying PLC code
- New controllers can utilize existing legacy Allen-Bradley® I/O
- Enables your Remote I/O PLC-5® or SLC™ to communicate with EtherNet/IP FLEX™ I/O adapters, giving you a phased migration option when your 1794-ASB spares are gone

## Legacy Competitive PLC Migration Solutions

### AN-X(2) Family of Gateways

- Enables Allen-Bradley PAC via EtherNet/IP to control I/O devices on legacy networks
- Enables a phase-based approach for migrating legacy control systems
- Monitor mode enables testing & verification of PAC logic before controlling I/O

DCS migration solutions  
[psft.com/DB3](http://psft.com/DB3)

## 1761-NET-ENI Replacement – Update Your Legacy DF1 Systems

Need a 1761-NET-ENI now that it's been discontinued? The Routing Module can be used in nearly every application as the NET-ENI. Now you can modernize your legacy DF1 control system in phases using your OpEx budget.

- Intelligent routing to ControlLogix® or CompactLogix™ from PLC-5, SLC, MicroLogix™ controllers
- Direct-to-tag technology simplifies data mapping, reducing configuration time

## 1761-NET-AIC Replacement – Update your legacy DH485 systems

Need a 1761-NET-AIC replacement? This module can be used in nearly every application as the NET-AIC. Now you can modernize your legacy DH485-based system in phases using your OpEx budget.

- Intelligent data routing between DH485 and EtherNet/IP devices
- Direct-to-tag technology simplifies data mapping, reducing configuration time
- 2-port unmanaged switch or Device Level Ring (DLR) support

## ControlNet and DeviceNet Modernizations

- **ControlNet Router:** Connect existing equipment to new EtherNet/IP -using PanelView Plus terminals – without having to do some major re-cabling. The module also supports Device Level Ring networks or can be used as a two-port Ethernet switch.

- **DeviceNet Router:** Enables data exchanges via EtherNet/IP between DeviceNet devices and your Logix controller or a PanelView Plus terminal. The DeviceNet data can be mapped to a PLC5 type address file; from there, an Ethernet device (such as a PanelView) can either write to or read the data.

## Real-World Modernizations

American Castings estimates they saved over \$100,000 in lost production and implementation time, as well as 140 hours of troubleshooting and rewiring work.

[psft.com/DD5](https://psft.com/DD5)

Brains Brewery needed to upgrade its PLC-2® controllers - but only 3 days of downtime was available. The systems were updated, beer availability didn't skip a beat, and the process cost 40% less than an alternative modernization approach.

[psft.com/DD6](https://psft.com/DD6)

## PROFIBUS Solutions

ProSoft's PROFIBUS DP modules are ideal for the most demanding applications.

### For ControlLogix®

Through premier integration tools, you can minimize the time required to get a PROFIBUS DP network configured in a ControlLogix environment.

**Master/multi-slave module:** Can transfer up to 5000 bytes of cyclic I/O data with various slave devices on the network.

**Multi-slave module:** Can pass up to 2440 bytes of input and output data as high-speed cyclic I/O data on a PROFIBUS DP network.

### For CompactLogix™

**Master module:** Supports remote Ethernet connectivity with Asset Management Software, significantly lowering your maintenance costs.

**Slave module:** Supports DPV1 Acyclic Messaging; Add-On Profile provided to allow for seamless integration to Studio 5000 and RSLogix 5000.

## Gateways

Master and Slave gateways connect PROFIBUS DP equipment to devices using EtherNet/IP, Modbus Serial, or Modbus TCP/IP. PROFIBUS DP network commissioning time can be greatly reduced with the modules' built-in PROFIBUS DP packet capture utility. With support for up to 1536 bytes of Input and Output data, and up to 4 EtherNet/IP connections back to the processor, the modules provide performance and data throughput for even the most demanding of PROFIBUS applications.

### Siemens® Communications and Migrations

Siemens Industrial Ethernet gateways can be used to foster connections between equipment using the protocol and EtherNet/IP or Modbus TCP/IP devices. ProSoft's modules include 2-port gateways that allow each protocol to reside on separate subnets, allowing you to pass data between the two subnets without changing each device's IP address. The gateways' Add-On Profiles allow for simplified integration and reduced commissioning time.

In-chassis modules are available to help you share data between your new Rockwell Automation controller and your existing Siemens Industrial Ethernet PLC.

### PROFINET Gateways

- PROFINET Controller and Device Gateways connect to EtherNet/IP-based systems.
- Gateways with two Ethernet ports allow you to isolate networks, passing only the data you want between devices
- EtherNet/IP gateways support multiple I/O connections for fast real-time data

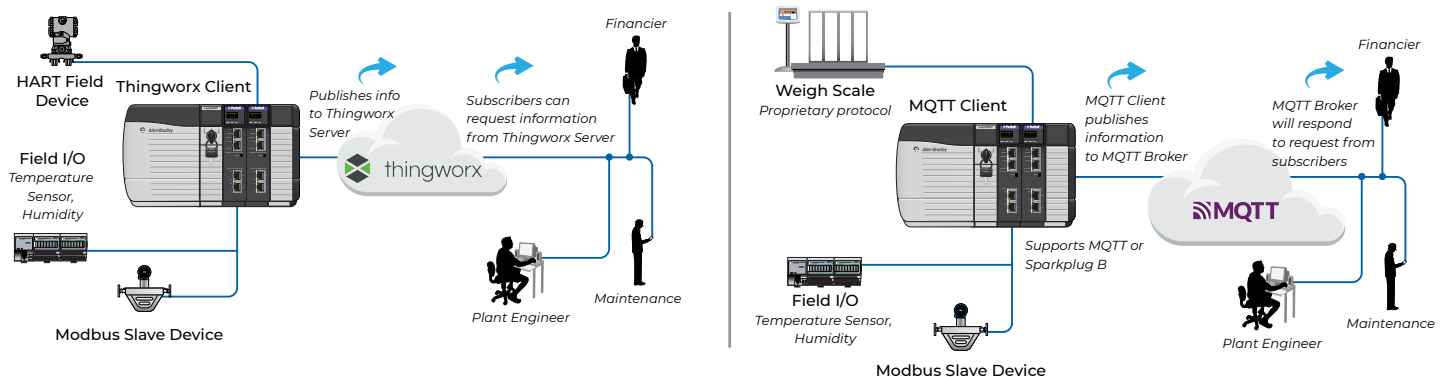

# Enterprise Connectivity

## Linux Development Modules

### Connect Your Logix Processor to ThingWorx or to a MQTT Broker

These edge-compute modules are ideal for custom algorithm applications, including the transfer of key operational data. The ControlLogix module's library has sample applications (complete with source code!) for ThingWorx®, Sparkplug B MQTT, and standard MQTT. These samples help enable direct connectivity, expanding your IIoT application.

- In-chassis modules simplify your site and bring data directly into your ControlLogix or CompactLogix; help minimize cabinet space
- Linux Virtual Machine (VM) and C/C++ development environment provided on separate DVD
- VM contains preinstalled toolchain and libraries

## Leverage the IIoT

**Collect, store, and analyze data to realize measureable business improvements.**

There's operational data within nearly every piece of equipment in your application – and you can use it to make changes that will positively affect your facility. ProSoft's in-chassis modules and standalone gateways have been used for 30 years to connect disparate equipment, the first step on the path to showing ROI from your IIoT improvements.

**The best IIoT steps for your operation**  
[psft.com/DB5](https://psft.com/DB5)

# Automated Material Handling

Reliability is key for any Automated Material Handling application.

Industrial gateways and wireless radios enable communications between equipment in busy facilities, helping you maintain production and meet increased consumer demand.

## Logistics

Increased consumer demand for goods bought online has heightened the need for reliable, on-time delivery of many household goods. Industrial protocol gateways and wireless radios can help ensure accurate production and distribution; real-time communications between moving equipment such as smart conveyors and automated guided vehicles (AGVs); and the safety of on-site employees in increasingly mobile applications.

### Real-World Examples

A **logistics end user** needed to find a reliable alternative to slip rings for a conveyor application. Wireless radios now communicate with their CompactLogix.

[psft.com/DEA](https://psft.com/DEA)

A **perfume manufacturer** produces its samples thanks to improved communication with their scale.

[psft.com/DEB](https://psft.com/DEB)

## Automotive

**Automotive production is an intricate process whose automated elements rely on real-time communications.**

Moving parts throughout a facility – whether they're half-finished vehicle frames moving down a production line or AGVs ferrying supplies – require reliable communications to protect workers and product throughout the site. Ultra-Fast Industrial Hotspots can help.

### Real-World Examples

Fiat Chrysler increased production flexibility – and saved downtime – when they paired wireless radios with new Rockwell Automation controllers.

[psft.com/DD4](https://psft.com/DD4)

A UK end user needed to transport materials within its automotive facility. The machine builder Mirage paired AGVs with wireless radios

[psft.com/DD9](https://psft.com/DD9)

### Automotive Skillet Line Communication

### AGV Communication

## Amusement

**At the top of any amusement end user or machine builder's mind is the need to maintain riders' safety.**

Using wireless communications over CIP Safety helps increase communications for thrilling rides – as well as the safety of everyone on-board.

### Real-World Examples

**Safety on the Skyfall:** The company Funtime added radiating cable and a wireless radio to best monitor this freefall ride's signals.

[psft.com/DEC](https://psft.com/DEC)

**Improvements to the Disk'O Coaster:** Using a wireless Ethernet-based solution paired with a safety protocol helped this ride manufacturer improve the data rate of communication.

[psft.com/DED](https://psft.com/DED)

## 802.11n (abgn) Fast Industrial Hotspots

- Ultra-Fast access point switchover times of less than 10 ms are perfect for applications such as automated storage-retrieval systems, AGVs, and automotive skillet lines
- EtherNet/IP™ embedded object and Modbus® agent support lets users get radio diagnostics into their PAC/PLC, where the information can be analyzed and acted upon, helping to reduce downtime
- WPA/WPA2-Personal (PSK, AES and/or TKIP); WPA/WPA2-Enterprise (IEEE 802.1X/RADIUS, AES and/or TKIP)
- Secure digital configuration storage for quick field replacement
- Radios support wireless safety Ethernet networks, ideal for automated material handling applications

**2.4 GHz and 5 GHz High-Power Industrial Hotspots are also available for longer-distance applications.**

### 802.11abgn Wireless Plant Architecture

- 2.4 GHz or 5 GHz High-Speed Wireless Network

# Radiating Cable 2.4 and 5 GHz Band

Acting as a long, flexible antenna, Radiating Cable is an alternative to traditional RF antenna systems.

## Features

- Special coaxial shield design uses slots to radiate RF Signals
- Available in variable lengths
- Pre-assembled cable for easy installation
- Frequency Range: 2.4 GHz, 5 GHz to 6 GHz

## Benefits

- Wireless signal more stable in terms of response time – useful in communicating with I/O
- Used in metallic environments, rotating/spinning machines, conveyors, AGVs, warehousing, and more

How you'll benefit from radiating cable  
[psft.com/CXL](http://psft.com/CXL)

## 802.11n (abgn) Fast Watertight Industrial Hotspots

- IP67 water/dust-rated
- Designed for extreme temperatures (-40° to +70°C), high vibration/shock and hazardous locations (UL C1D2, ATEX Zone 2)
- Ultra-Fast Roaming with under 10 ms switchover times maintains connections for moving machines/platforms
- Power over Ethernet (PoE)
- QoS and VLAN for optimum traffic management
- WPA/WPA2-Personal (PSK, AES and/or TKIP)
- WPA/WPA2-Enterprise (IEEE 802.1X/ RADIUS, AES and/or TKIP)

## Wireless Support from Trusted Experts

Designing and implementing a wireless network is a major investment. ProSoft's wireless field application engineers can help ensure a smooth design and installation for your application. Our professional wireless services include:

- Expert Phone Support
- Engineering Drawing Review
- Site Surveys
- Configuration Support
- Troubleshooting

Contact us at [psft.com/DD8](https://psft.com/DD8) to learn more.

### Wireless Application Guide:

In this comprehensive resource, find out the key considerations for adding wireless communications over CIP Safety. [psft.com/DD7](https://psft.com/DD7)
