sales@nhp.com.au | sales@nhp-nz.com

nVent HOFFMAN floor standing enclosures are the flexible enclosure choice for all arduous locations

Flexible options

- Single and double door versions available in a range of heights, widths and depths, in 316L stainless steel (SS) or powder coated mild steel (MS)
- Available in fully welded and bayable/combinable versions
- Shared range of accessories including inner doors, plinths, rain hoods, 19" rack mounting and locks for easy customising
- Enclosures can be fitted with climate control options such as heaters, ventilation fans, heat exchangers and air conditioning units

Robust design

- Worldwide certifications (CE, CSA, GOST, Kema Keur, Lloyds Shipping, cULus)
- IK10 impact resistance rating across the whole floor standing enclosure range provides high resistance to vandalism
- Continuous welding for maximum strength with no weak spots
- Steel door frame with fixed corner pieces and mounting profiles
- Formed corners with single bend and smooth, consistent finish
- Uniform powder coat structure and thickness on frame and panels with guaranteed adherence on corners delivers exceptionally durable finish with better corrosion protection in indoor applications
- Smooth, polished consistent finish on external welds reduces potential for bacterial growth in food and beverage applications
- IP55 or IP66 ingress protection (model dependant)
- AISI 316L marine grade stainless steel provides high corrosion protection in harsh and marine environments

Innovative features

- Snapline quick-fixation baying brackets and CLPF profile system provide tool-free installation, reducing assembly time by up to 80% or 14 minutes
- New customisable locking handle with transparent covers top and bottom, allowing a company name or logo to be inserted
- New metallic lifting handles in either RAL 9005 (mild steel models) or chrome (stainless steel models) finishes are compatible with standard locking inserts and half cylinders
- Enhanced security indicator provides audible click when the enclosure is correctly locked or unlocked
- Slave doors on double door models come with locking system as standard, eliminating slave doors opening in an uncontrolled fashion and safeguarding operators from harm
- Flat locking rods positioned parallel to the enclosure door provide an improved flush design and when combined with the self-positioning locking catchers, provide smooth opening and closing motion
- An improved polyurethane gasket that absorbs 50% less water than traditional polyurethane gaskets, greatly reducing the risk water ingress into the enclosure when the gasket is compressed when closing the door
- Mounting plate is supplied on the outside of the enclosure, eliminating the need to unpack everything to get to the mounting plate, saving time and fitting components
- Low profile bottom cable entry profile section with pre-fitted foam can be easily click-mounted in place, saving installation time
- A unique profile guarantees strength, rigidity and flexible mounting options

Key features

Improved locking

- Audible click indication when closed correctly
- Multiple lock options available

New customisable locking handle

- Transparent cover allowing company name to be inserted
- Range of locking options available

New flat locking rods

- Improved flush design
- Smooth operation

New locking system

- Multiple locking points provide secure door closure guaranteeing IP rating

New locking system

- Flat rods parallel to the door provide smooth operation and positive closing

Welded hinge design

- Twin hinge pin design
- Easier mounting and detaching of door
- Machined slots in pin plus retainer in hinge body ensures pins remain within the hinge

Flexible mounting options

- Multiple accessories available for easy customisation

Easy to fit side panels

- Combinable versions feature an easy to hang side panel

MKS/MKD mild steel single/double door semi-compact enclosure range

MS - nVent HOFFMAN compact MKS (single door)/MKD (double door) range

- Single door: size H1600 x W600 x D400 to H2000 x W1000 x D400
- Double door: size H1600 x W1200 x D400 to H2000 x W1600 x D400
- IP55 ingress protection
- RAL 7035 powder coated
- Four times folded and seam welded frame
- Removable rear and roof panels
- Four point locking system with 3mm DIN lock
- Fully formed
- Adjustable mounting plate
- Large range of accessories

EKSS/EKDS stainless steel single/double door compact enclosure range

SS -nVent HOFFMAN compact EKSS (single door)/EKDS (double door) range

- Single door: size H1800 x W600 x D400 to H2000 x W1000 x D400
- Double door: size H1800 x W1200 x D400 to H2000 x W1600 x D400
- IP66 ingress protection (single door models and double door models with centre mullion) / IK10 impact resistance
- IP55 ingress protection (standard double door models without centre mullion) / IK10 impact resistance
- AISI 316L pre-grained stainless steel
- One piece body with integrated depth profiles
- Removable rear panels and adjustable mounting plate
- Four point locking system with chrome plated 3mm DIN lock

Accessories for nVent HOFFMAN floor standing enclosures

There are many accessories available for nVent HOFFMAN floor standing enclosures and these are discussed in detail below. Due to the large number, the accessories have been grouped into the following categories:

Mounting and baying: this includes baying brackets, plinths, wall fixing brackets and lifting lugs

Internal: this includes inner doors, mounting plates and profiles, separation plates and document holders

19" rack mounting: covers the range of 19" rack mount options, including brackets and profiles

Lighting: covers enclosure LED lighting options

Climate control: this includes pressure compensation devices, filter fans and grilles, thermostats and air conditioners

Mounting, baying and lifting accessories

This section includes plinths, wall fixing brackets, side panels, baying brackets and lifting lugs

Plinths for mild steel enclosures - PFxxxx, PSxxxx, PCPxx

Description

PF and PS mild steel plinths are designed to mount underneath the enclosure to provide extra space between the installation floor/ground level and the enclosure's bottom plates, allowing easier cable installation. This extra space allows the installer to route the cables through the plinths for bayed enclosures. Note that the front/rear plinth and side plinths need to be ordered separately, to correctly match the enclosure width and depth. Manufactured from powder coated mild steel, these plinths are available in two heights - 100mm and 200mm.

PCP plinth combining profiles connect between the plinth's front and rear corner pieces and act as a stabiliser and allow cables to be routed between bayed enclosures under the enclosure floor. It includes a 25mm hole pattern. When used with 200mm high plinths, the PCP may be mounted at three different heights – top, middle or bottom.

Note that the PCP are NOT compatible with stainless steel enclosures.

Ordering information – PF plinth front/rear 100mm high

- PF1040 - front/rear plinth, mild steel, H100 x W400mm
- PF1050 - front/rear plinth, mild steel, H100 x W500mm

Wall fixing brackets for mild steel enclosures - CCB02

Description The CCB02 wall mounting/fixing brackets allow a floor standing enclosure to be secured to a vertical surface, in situations where the enclosure is top heavy or when the floor attachment is not sufficient to guarantee stability. It is compatible with all nVent HOFFMAN mild steel floor standing enclosures (MCS, MCD, MKS, MKD)

Note that CCB02 are not recommended for stainless steel enclosures, use the CCBS02 instead

Ordering information **CCB02** – wall fixing bracket, supplied as a pack of two with M12 screws for attaching to the enclosure

Material 3mm zinc plated steel

Wall fixing brackets for stainless steel enclosures - CCBS02

Description The CCBS02 wall mounting/fixing brackets allow a floor standing enclosure to be secured to a vertical surface, in situations where the enclosure is top heavy or when the floor attachment is not sufficient to guarantee stability. It is compatible with all nVent HOFFMAN stainless steel floor standing enclosures (MCSS, MCDS, EKSS, EKDS)

Ordering information **CCBS02** – wall fixing bracket, supplied as a pack of two with M12 screws for attaching to the enclosure

Material 3mm AISI 304 grade pre grained stainless steel

Baying brackets for bayable mild steel and stainless steel enclosures - CCI6, CCM04, CCE6

Description CCI6 and CCM04 Snapline click in quick-mount internal baying brackets allow quick baying of two or more nVent HOFFMAN enclosures into a single enclosure assembly. Tool-free installation saves approximately 14 minutes per baying joint when compared to traditional, screw-based baying brackets. These brackets are compatible with both mild steel and stainless steel enclosures and satisfy the IEC 62208 standard. CCI6 baying brackets can be used to bay enclosures on site; CCM04 corner baying brackets are required if the bayed enclosure assembly is to be lifted and/or freighted in its bayed state.

CCE06 external baying brackets are mounted on the outside hole pattern of the frame and create a direct earthing connection between the enclosure frames.

Note that CCE06 brackets are only suitable for mild steel enclosures.

Ordering information **CCI6** – internal Snapline baying bracket, supplied in set of 6, suits mild steel and stainless steel enclosures

CCM04 – internal corner Snapline baying bracket, supplied as set of 4, suits mild steel and stainless steel enclosures

CCE06 – external baying bracket, supplied as set of 6 with mounting accessories – only suitable for mild steel enclosures

Material 3mm zinc plated steel

Baying brackets for baying nVent HOFFMAN mild steel enclosures to Rittal - TS8, CCTV06

Description The CCTV06 baying kit allows an nVent HOFFMAN mild steel bayable enclosure to be bayed with a Rittal TS8. This can be used when an existing TS8 system needs to be expanded.

Note that CCTV06 brackets are only suitable for mild steel enclosures.
Please contact NHP for more information.

Ordering information **CCTV06** – internal baying bracket nVent HOFFMAN to Rittal TS8, supplied in set of 6 with mounting accessories

Material 3mm zinc plated steel

Side panels for bayable enclosures - SPMxxxxR5, SPMSxxxx316

Description SPM..R5 and SPMS..316 side panels ensure that the ingress protection of the enclosure is maintained so that electrical components inside can operate without disturbance and protect personnel from injuries. Supplied as a set of 2 panels with mounting accessories – one set is required per single enclosure or per bayed enclosure assembly. The SPM..R5 side panels are for use with mild steel enclosures. The SPMS..316 side panels are for use with stainless steel enclosures.

Ordering information – mild steel side panels

- SPM1804R5** – side panels (qty 2), mild steel, H1800 x D400mm
- SPM1805R5** – side panels (qty 2), mild steel, H1800 x D500mm
- SPM1806R5** – side panels (qty 2), mild steel, H1800 x D600mm
- SPM1808R5** – side panels (qty 2), mild steel, H1800 x D800mm
- SPM2004R5** – side panels (qty 2), mild steel, H2000 x D400mm
- SPM2005R5** – side panels (qty 2), mild steel, H2000 x D500mm
- SPM2006R5** – side panels (qty 2), mild steel, H2000 x D600mm
- SPM2008R5** – side panels (qty 2), mild steel, H2000 x D800mm

Ordering information – stainless steel side panels

- SPMS1805316** – side panels (qty 2), 316L S/S, H1800 x D500mm
- SPMS2006316** – side panels (qty 2), 316L S/S, H2000 x D600mm

Material SPM...R5 side panels: 1.5mm mild steel, RAL 7035 structured powder coating
SPMS...316 side panels: 1.5mm AISI 316L grade 400 pre-grained stainless steel

Lifting accessories for enclosures - LE9304, LC02

Description LE lifting eye bolts mount directly to the enclosure corners for when lifting operations are required. Complies with DIN 580 lifting requirements. M12 thread. 3400N per lifting eye with max angle of 45°. The LE9304 may be used to lift individual enclosures or to lift bayed enclosures in conjunction with the LC lifting device.

The LC lifting device is recommended for optimal weight distribution when lifting bayed enclosures. Note that CCM04 corner baying brackets must be fitted to the bayed assembly for lifting.

Note: the lifting accessories are also available in stainless steel versions. Please contact NHP for details.

Ordering information **LE9304** – lifting eye bolts, supplied as set of 4
LC02 – lifting device, supplied as set of 2 with mounting accessories

Material Zinc plated steel

Internal accessories

This section includes all internal mounting accessories such as inner doors, mounting profiles, separation plates and brackets EXCEPT 19" rack equipment (separate section)

Inner doors for floor standing enclosures - DIxxxxR5

Description

DI inner doors provide a hinged mounting surface for equipment such as displays, indicators or switches behind a standard or glazed front door, while covering other components and preventing unauthorised access. A mounting space of 80 mm is available between the doors when the inner door is in the most forward position. Can be adjusted in depth by steps of 25 mm. The inner door is equipped with two double-bit 3 mm locks. Supplied with mounting accessories. DI inner doors are compatible with both mild steel and stainless steel enclosures.

Ordering information

DI1606R5 – inner door, H1600 x W600mm
DI1608R5 – inner door, H1600 x W800mm
DI1806R5 – inner door, H1800 x W600mm
DI1808R5 – inner door, H1800 x W800mm
DI1810R5 – inner door, H1800 x W1000mm
DI2006R5 – inner door, H2000 x W600mm
DI2008R5 – inner door, H2000 x W800mm
DI2010R5 – inner door, H2000 x W1000mm

Note: other sizes are available on request, however a longer lead-time and minimum order quantity may apply. Please contact NHP with your query.

Material

1.5mm mild steel with RAL 7035 structured powder coating

Wide mounting plate and traverse sliding profile for bayable enclosures - MPWxxxx and MTSxxxx

Description

MPW extra wide mounting plates offer more mounting space than the standard mounting plate and can have components mounted before being fitted within the enclosure. The MPW wide mounting plate requires the corresponding width MTS traverse sliding profiles to be mounted. Supplied as a set of two, the MTS sliding profile is depth-adjustable in 25mm steps.

Note - the MPW wide mounting plate cannot be fitted to compact (non-bayable) enclosures as it must be installed from the side

Ordering information – MPW wide mounting plates

MPW1806 – wide mounting plate, H1800 x W600mm
MPW1808 – wide mounting plate, H1800 x W800mm
MPW1810 – wide mounting plate, H1800 x W1000mm
MPW1812 – wide mounting plate, H1800 x W1200mm
MPW1816 – wide mounting plate, H1800 x W1600mm
MPW2005 – wide mounting plate, H2000 x W500mm
MPW2006 – wide mounting plate, H2000 x W600mm
MPW2008 – wide mounting plate, H2000 x W800mm
MPW2010 – wide mounting plate, H2000 x W1000mm
MPW2012 – wide mounting plate, H2000 x W1200mm
MPW2016 – wide mounting plate, H2000 x W1600mm

Ordering information – MTS traverse sliding profiles

MTS500 – traverse sliding profiles (qty 2), W500mm
MTS600 – traverse sliding profiles (qty 2), W600mm
MTS800 – traverse sliding profiles (qty 2), W800mm
MTS1000 – traverse sliding profiles (qty 2), W1000mm
MTS1200 – traverse sliding profiles (set of 2), W1200mm
MTS1600 – traverse sliding profiles (set of 2), W1600mm

Material

MPW: 3mm galvanised steel
 MTS: 3mm zinc plated steel

180 degree hinge kit - DHN180

Description The DHN180 adjustable 180 degree hinge kit makes it possible to open the doors 180°, even when enclosures are bayed together. Machining is required to install the DHN180

Ordering information **DHN180** – 180 degree hinge kit, supplied as a set of 4 with mounting accessories

Material Die-cast alloy, structured blue finish

Mounting profiles, unidirectional Snapline - CLPFxxx

Description The CLPF profile system is a 40mm wide and 25mm high mounting profile can be mounted in all directions on the enclosure's frame, providing full flexibility for the mounting of accessories, components and other equipment. Two rows of hole patterns for cage nut fixing and self-tapping screws are provided. The CLPF is a Snapline accessory and can be quickly and easily installed without any tools. All CLPF profiles are supplied as a set of 4.
Note – for CLPF400 – CLPF 1200, the maximum loading is 800N horizontal and 1000N vertical; for CLPF1400 – CLPF2000, only vertical loads are allowed

Ordering information

- CLPF400** – Snapline mounting profile W/D 400mm, 800/1000N maximum loading, set of 4
- CLPF500** – Snapline mounting profile W/D 500mm, 800/1000N maximum loading, set of 4
- CLPF600** – Snapline mounting profile W/D 600mm, 800/1000N maximum loading, set of 4
- CLPF800** – Snapline mounting profile W/D 800mm, 800/1000N maximum loading, set of 4
- CLPF1000** – Snapline mounting profile W/D 1000mm, 800/1000N maximum loading, set of 4
- CLPF1200** – Snapline mounting profile W/D 1200mm, 800/1000N maximum loading, set of 4
- CLPF1400** – Snapline mounting profile W/D 1400mm, only vertical loads allowed, set of 4
- CLPF1600** – Snapline mounting profile W/D 1600mm, only vertical loads allowed, set of 4
- CLPF1800** – Snapline mounting profile W/D 1800mm, only vertical loads allowed, set of 4
- CLPF2000** – Snapline mounting profile W/D 2000mm, only vertical loads allowed, set of 4

Note: other sizes are available on request – however a longer lead-time and minimum order quantity may apply – please contact NHP with your query.

Material Zinc plated steel

Mounting plate reinforcement profiles - MPRxxxx, MPWRxxxx

Description The MPR and MPWR reinforcement kits stiffen the mounting plate and allow heavy components to be mounted while dampening down any vibrations. The MPR suits standard mounting plates (as supplied with the enclosure), while the MPWR suits the optional MPW wide mounting plate.

Supplied as a kit of two profiles with mounting accessories It is recommended for use with mounting plates wider than 1000mm. The profiles should be equally spaced on the rear of the mounting plate.

Ordering information

- MPR1000** – reinforcing profile kit 1000mm wide
- MPR1200** – reinforcing profile kit 1200mm wide
- MPR1600** – reinforcing profile kit 1600mm wide
- MPWR1000** – reinforcing profile kit, 1000mm wide, for MPW
- MPWR1200** – reinforcing profile kit, 1200mm wide, for MPW

Material 2mm zinc plated steel

Filler plate for bayable enclosures - MPFxxxx

Description	MPF filler plates covers the space between pairs of adjacent mounting plates in a bayed enclosure assembly, to provide a continuous working surface. Snapline technology allows fast, easy installation without the use of tools. Supplied with mounting accessories. The MPF is compatible with both mild steel and stainless steel enclosures.
Ordering information	MPF1800 – filler plate suits 1800mm high enclosures MPF2000 – filler plate suits 2000mm high enclosures
Material	2mm zinc plated steel

Carrier bars - CBxxx

Description	CB carrier bars, fitted in the base of the floor standing enclosure, allow heavy equipment such as transformers to be mounted. They can be adjusted in width or depth within the enclosure's frame. The CB are supplied as a pair with mounting accessories. Note: observe the maximum permissible load (varies by model).
Ordering information	CB400 – carrier bars W/D 400mm, 2500N max loading, set of 2 CB500 – carrier bars W/D 500mm, 2100N max loading, set of 2 CB600 – carrier bars W/D 600mm, 1800N max loading, set of 2 CB800 – carrier bars W/D 800mm, 1300N max loading, set of 2
Material	3mm galvanised steel

Separation plates - SPDxxx and mounting brackets CCJ12

Description	The SPD separation plate separates bayed enclosures while maintaining the IP rating, creating individual spaces for components to be mounted. The SPD provides IP43 between the two enclosures and is compatible with CCI6 and CCM04 baying brackets. CCJ12 mounting brackets are required to fit the SPD inside the bayed enclosure assembly.
Ordering information	SPD1804 – separation plate H1800 x D400mm SPD1805 – separation plate H1800 x D500mm SPD2004 – separation plate H2000 x D400mm SPD2005 – separation plate H2000 x D500mm CCJ12 – baying kit for separation plate, supplied as set of 12 with mounting accessories
Material	SPD: 1.5mm zinc plated steel CCJ12: 3mm zinc plated steel

Document holders DRA4 - DRBxxxR5

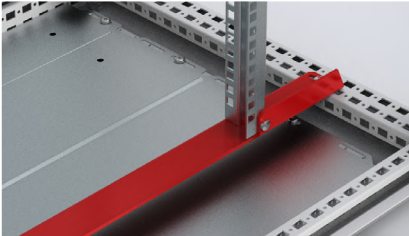

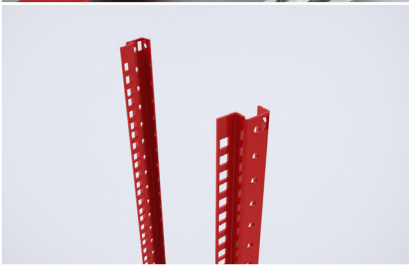

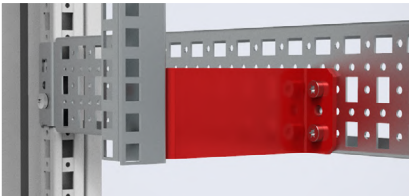

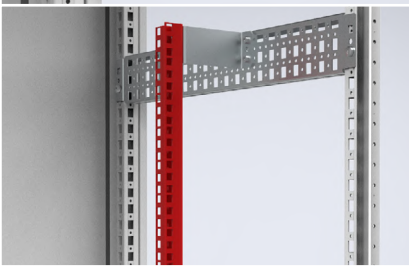

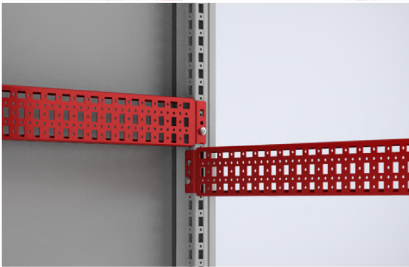

Description	Document holders/document can be mounted in the enclosure to ensure that the required documents are readily available. The DRA4 document pocket, with a usable depth of 30mm suits documents up to A4 in size and is made from polymer and attaches easily with double sided tape. The DRBxxxR5 range of document pockets, with a usable depth of 68mm, is designed for mounting to the enclosure door frame is made from powder coated mild steel and is available in several sizes to suit various width enclosure doors.
Ordering information	DRA4 – self-adhesive document pocket A4 DRB0303R5 – universal document pocket 300mm wide DRB600R5 – document pocket for W600mm doors DRB800R5 – document pocket for W800mm doors
Material	DRA4: thermoplastic, RAL 7035 DRBxxxR5: 2mm zinc plated steel with RAL 7035 structured powder coating

19" rack mounting accessories

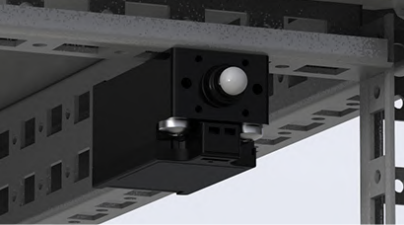

This section lists the various 19" rack mount options that are available.
Note that certain accessories must be used together to complete the installation.

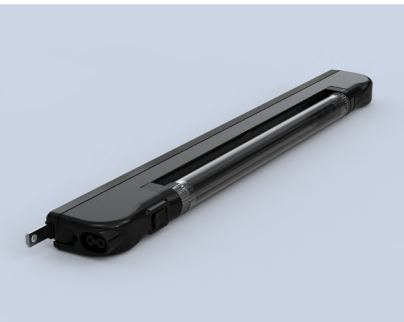

19" brackets and profiles - CIBxxx, CIC04, CIPxx, CIPPxx, CIWRxx

	<p>Description CIB</p> <p>CIB profiles allow 19" CIP vertical profiles to be mounted so that equipment designed for 19" rack mounting can be installed. CIB are available in two widths, to suit 600mm and 800mm wide enclosures and are compatible with both mild steel and stainless steel models. Supplied as a set of 2 with mounting accessories.</p>
	<p>Ordering information CIB</p> <p>CIB600 – 19" profile fixing brackets, W600mm, set of 2 CIB800 – 19" profile fixing brackets, W800mm, set of 2</p>
	<p>Material CIB</p> <p>3mm zinc plated steel</p>
	<p>Description CIP</p> <p>CIP 19" full height 19" profiles allow 19" rack mounted equipment to be installed in floor standing enclosures. Available in a range of heights, they are supplied as set of 2 with mounting accessories. Note that CIB profiles are required to mount the CIP</p>
	<p>Ordering information CIP</p> <p>CIP29 – 19" profiles H1400mm / 24RU, supplied as a set of 2 CIP38 – 19" profiles H1800mm / 38RU, supplied as a set of 2 CIP42 – 19" profiles H2000mm / 42RU, supplied as a set of 2</p>
	<p>Material CIP</p> <p>2mm zinc plated steel</p>
	<p>Description CIC</p> <p>CIC brackets allow the CIPP 19" partial height profiles to be installed in 800mm wide enclosures. They are supplied as a set of 4 with mounting accessories</p>
	<p>Ordering information CIC</p> <p>CIC04 – brackets for partial height 19" fixing, set of 4</p>
	<p>Material</p> <p>3mm zinc plated steel</p>
	<p>Description CIPP</p> <p>CIPP partial height 19" mounting profiles are both height and depth adjustable for flexible mounting of 19" rack equipment. They are supplied as a set of 2 with mounting accessories. Note that CIPP brackets require CIC and/or CIWR to complete the installation</p>
	<p>Ordering information CIPP</p> <p>CIPP06 – 19" mounting profiles partial height 350mm / 6RU CIPP11 – 19" mounting profiles partial height 550mm / 11RU CIPP15 – 19" mounting profiles partial height 750mm / 15RU CIPP18 – 19" mounting profiles partial height 875mm / 18RU</p>
	<p>Material CIPP</p> <p>2mm zinc plated steel</p>
	<p>Description CLPK</p> <p>CLPK click in profiles allow CIP, CIPP and other accessories and components to be installed. CLPK are fixed directly to the enclosure frame and so do not require any additional brackets. Supplied as a set of 4.</p>
	<p>Ordering information CLPK</p> <p>CLPK400 – click in profile W/D400mm, supplied as a set of 4 CLPK500 – click in profile W/D500mm, supplied as set of 4 CLPK600 – click in profile W/D600mm, supplied as a set of 4 CLPK800 – click in profile W/D800mm, supplied as a set of 4</p>
	<p>Material CLPK</p> <p>1.5mm zinc plated steel</p>
	<p>Description CIWR</p> <p>CIWR 19" width reducers are designed to mount in 800mm wide enclosures and allow full height CIP or partial height CIPP 19" profiles to be mounted, with continuous depth adjustment. CIWR can also be used to reinforce full height CIP 19" profiles. The maximum permissible load is 5000N on 2 pairs and 8000N on 3 pairs of CIWR. The CIWR are supplied as a set of 2 with mounting accessories mounting of 19" rack equipment. They are supplied as a set of 2 with mounting accessories. Note that CIPP brackets require CIC and/or CIWR to complete the installation</p>
	<p>Ordering information CIWR</p> <p>CIWR8196 – 19" width reducers for W800 x D600mm enclosures, supplied as a pair with mounting accessories CIWR8198 – 19" width reducers for W800 x D800mm enclosures, supplied as a pair with mounting accessories</p>
	<p>Material CIWR</p> <p>2mm zinc plated steel</p>

Enclosure lighting

This section provides a high-level overview of the climate control options available. Please refer to the Climate Control Selection Guide or contact NHP for more details.

Door switch - DSW01, TLCS01	
	<p>Description</p> <p>Door switches allow lights or other electrical devices to turn on or off automatically when the enclosure door is opened. They include a NO (normally open) and one NC (normally closed) volt-free contact. Designed to be mounted directly to the enclosure frame. The mounting locations ensure that the switch is always positioned for correct operation once installed</p>
	<p>Ordering information</p> <p>DSW01 – Door switch 3A / 240V, with M20 cable entry, supplied with mounting accessories</p> <p>TLCS01 – Door switch for TLC range of LED lights, supplied with 1.5m long cable</p>
<p>Material</p>	<p>Polymer body</p>

Enclosure lights - LED025xxxx, TLS5S and TL87035	
	<p>Description</p> <p>LED 025 enclosure lights manufactured by Stego are suitable for all enclosures. They are available in 100-240V AC and 24-48V DC versions in both screw mount and magnet mount, with door switch and built-in motion sensor operation. With 400 lumens, 120° illumination angle and daylight white (6000K) colour, they provide good illumination inside the enclosure.</p> <p>Contact NHP for additional information and other options.</p>
<p>Ordering information</p>	<p>LED02540001 – LED 025 lamp 5W/400Lm 100-240V AC, screw mount, for door switch, supplied with connector</p> <p>LED02540101 – LED 025 lamp 5W 24-48V DC, screw mount, for door switch, supplied with connector</p>
<p>Material</p>	<p>Transparent plastic housing</p>
	<p>Description:</p> <p>The TLCL87035 is a compact design 7.2W LED light suitable for mounting on 19" rack profiles. Available in both 220-240V AC and 24V DC versions, the TLCL87035 provides 945Lm of illumination and a service life of 50,000 hours.</p> <p>Note that the TLCS01 is recommended for best operation</p>
<p>Ordering information</p>	<p>TLCL87035 – compact LED light 7.2W/945Lm 220-240V AC, screw mount for door switch</p> <p>TLCL8703524 – compact LED light 7.2W/945Lm 24V DC, screw mount for door switch</p>
<p>Material</p>	<p>PC-ABS housing</p>

Climate control

This section provides a high-level overview of the climate control options available. Please refer to the Climate Control Selection Guide or contact NHP for more details.

Rain hoods for floor standing enclosures - MSSTxxxx

Description	MSST rain hoods feature a sloped roof and prevent water dripping into the enclosure when the door is opened. Manufactured from AISI 316L grade stainless steel, MSST rain hoods are supplied with mounting accessories. Rain hoods are recommended where the enclosure location is exposed to inclement weather. Note: rain hoods are not compatible with bayed enclosures
Ordering information	MSST0640316 – rain hood, 316L S/S, W600 x D400mm MSST0840316 – rain hood, 316L S/S, W800 x D400mm MSST1040316 – rain hood, 316L S/S, W1000 x D400mm MSST1240316 – rain hood, 316L S/S, W1200 x D400mm MSST1640316 – rain hood, 316L S/S, W1600 x D400mm
Material	1.5mm AISI 316L grade 400 pre-grained stainless steel

Fan covers - EFCSxxxx

Description	EFCS fan covers feature a sloped roof and prevent rain and water in hose-down applications hitting the filter fan or filter grille. Supplied with mounting accessories. Made from 316 grade stainless steel, they are compatible with both mild and stainless steel enclosures and should always be used where the enclosure is likely to be exposed to rain or hose down cleaning. The EFCS is available in three sizes to suit different sizes of the GSV filter fans and GSF filter grilles
Ordering information	EFCS20316 – fan cover H275 x W175 x D100mm, suits GSV1000, GSF10 sizes EFCS2530316 – fan cover H375 x W275 x D100mm, suits GSV1500, GSV250, GSF15, GSF20 sizes EFCS5060316 – fan cover H450 x W350 x D100mm, suits GSV30, GSF30 sizes
Material	1.5mm AISI 316L grade stainless steel

Climate control options

Depending on application and ambient conditions, additional climate control may be required. NHP has a complete range of cooling and heating products to ensure your equipment is operating at the right temperature.

	Outdoor	Outdoor harsh or wash-down environments
Cooling to ambient temperature	 <p>GSV, GSF series</p>	 <p>CVO stainless steel</p>
Cooling below ambient temperature	 <p>CVO series</p>	 <p>CVO stainless steel</p>
Heating/preventing condensation in small enclosures	 <p>CSK060 series</p>  <p>HGK047 series</p>  <p>HG140 series</p>	
Heating/preventing condensation in large enclosures	 <p>CS series</p>  <p>HVL031 series</p>  <p>HGL046 series</p>  <p>CR0270 series</p>  <p>CR130 series</p>  <p>HVI series</p>  <p>DA28455</p>  <p>DD084</p>	

Please refer to the NHP Climate Control Easy Selection Guide for more information

Filter fans GSVxxxx and filter grilles GSFxx

Description

Kryos³ GSV filter fans and GSF filter grilles, manufactured by Cosmotec, are easy to install with clip-on mounting. GSV filter fans have efficient filter mats, screwless terminals, long life ball bearing fans and have a reversible fan motor for air in or air out. Available in a range of sizes and air flows, they are suitable for all floor standing enclosures and have IP54 protection. They can be used both indoors and outdoors, however a suitable EFCS fan cover should be installed in locations where inclement weather, or hose-down cleaning may occur. Replacement filter mats are available.

For more information on the GSV/GSF range please refer to the Climate Control Selection Guide and Price List Catalogue.

Ordering information – filter fans

GSV1000211 – filter fan H119 x W119 x D58mm 24V DC 35m³/hr
GSV1000220 – filter fan H119 x W119 x D58mm 230V AC 35m³/hr
GSV1500211 – filter fan H152 x W152 x D75mm 24V DC 67m³/hr
GSV1500220 – filter fan H152 x W152 x D75mm 230V AC 67m³/hr
GSV2000211 – filter fan H204 x W204 x D98mm 24V DC 108m³/hr
GSV2000220 – filter fan H204 x W204 x D98mm 230V AC 108m³/hr
GSV2500211 – filter fan H250 x W250 x D118mm 24V DC 190m³/hr
GSV2500220 – filter fan H250 x W250 x D118mm 230V AC 190m³/hr
GSV2501220 – filter fan H250 x W250 x D99mm 230V AC 270m³/hr
GSV3000220 – filter fan H318 x W318 x D139mm 230V AC 500m³/hr
GSV3001220 – filter fan H318 x W318 x D135mm 230V AC 700m³/hr
GSV3002220 – filter fan H318 x W318 x D161mm 230V AC 850m³/hr
GSV3002262 – filter fan H318 x W318 x D161mm 400V AC 850m³/hr

Ordering information – filter grilles

GSF10 – filter grille H119 x W119 x D29mm
GSF15 – filter grille H152 x W152 x D33mm
GSF20 – filter grille H204 x W204 x D34mm
GSF25 – filter grille H250 x W250 x D48mm
GSF30 – filter grille H318 x W318 x D34mm

Ordering information – replacement filter mats

AVAFAGS10 – replacement filter mat IP54 suits GSV1000, GSF10, pack of 10
AVAFAGS15 – replacement filter mat IP54 suits GSV1500, GSF15, pack of 10
AVAFAGS20 – replacement filter mat IP54 suits GSV2000, GSF20, pack of 10
AVAFAGS25 – replacement filter mat IP54 suits GSV2500, GSF25, pack of 10
AVAFAGS30 – replacement filter mat IP54 suits GSV3000, GSF30, pack of 10

Material

Filter fan and filter grille body: ABS
 Filter mat: synthetic fibre

Pressure compensation devices - DA284xx

Description

DA284 pressure compensation devices, manufactured by Stego, are easy to install and provide effective pressure equalisation between the inside and outside of the enclosure. The one-way membrane allows moisture to escape while preventing the ingress of liquid water or dirt and debris.

AS3000:2018 clause 1.7.2 states that "a breathing/pressure equalization valve shall be installed to assist with changes in humidity and drainage of moisture". Therefore, to comply with the new AS3000:2018 standards, pressure compensation devices must be fitted to all enclosures where condensation is likely to occur - in practice all enclosures installed outside.

Pressure compensation devices should always be installed in pairs on opposite sides of the enclosure. The Stego DA284 are available in stainless steel and plastic and have an ingress protection rating of IP66 according to EN 60259 and IP69K according to EN 400050-9.

Ordering information – pressure compensation devices

DA28400 – pressure compensation device, plastic, M40 IP66/X9K (QTY 2)

DA28455 – pressure compensation device, AISI 303 grade stainless steel, M40 IP66/X9K (QTY 1)

DA28455S – pressure compensation device, AISI 316L grade stainless steel, M40 IP66/X9K (QTY 1)

DA28420000 – pressure compensation device, plastic, M40 IP66, snap/clip in mounting (QTY 1)

Material

Varies by model

NHP can provide custom enclosure solutions for specific projects (example shown below). Note that longer lead-times and minimum order quantity may apply. Please contact NHP with your query.

Applications and key benefits

The nVent HOFFMAN floor standing enclosure range has been designed with flexibility and user friendliness in mind and provides robust protection to valuable equipment installed inside the enclosure. Intended for harsh environments, nVent HOFFMAN floor standing enclosures are ideally suited to applications in the following industries:

- Heavy industry
- Food and beverage
- Commercial and retail
- Mining
- Water and waste water treatment plants
- Healthcare and hospitality
- Marine environments
- Renewable energy
- Other arduous environments

The nVent HOFFMAN floor standing enclosure range offers several key benefits:

- Available in a wide range of standard sizes ex-stock, minimising delivery time
- The mild steel and stainless steel versions are built on the same platforms, ensuring compatibility of accessories across the range and eliminating the need to stock multiple accessory versions
- The innovative click-in profile system provides flexibility and saves assembly time
- The continuous welding eliminates weak spots and provides rigidity, thus ensuring the ingress protection rating is maintained
- The smooth, fully polished finish on the stainless steel versions eliminates locations where bacteria can accumulate and facilitates easy cleaning, particularly important in food and beverage applications
- The uniform powder coating thickness and full corner coverage, together with the inherent rigidity of the enclosure, eliminates the possibility of paint cracking on corners, thus maximising corrosion protection
- An optional rain hood can be fitted for outdoor applications, prolonging enclosure life and protecting the internal components

Certifications for nVent HOFFMAN floor standing enclosure range:

Technical information

Material (body):	1.35mm (MKS, MKD) 1.5mm mild steel (MCS, MCD) / 1.5mm AISI 316L stainless steel (EKSS, EKDS, MCSS, MCDS)
Material (door):	2mm mild steel (MCS, MCD, MKS, MKD) / 2mm AISI 316L stainless steel (EKSS, EKDS, MCSS, MCDS)
Finish:	Mild steel: RAL 7035 structured powder coat Stainless steel: 400 pre grained with fully polished welds
Lock:	nVent HOFFMAN customised Espagnolette 4-point locking system with enhanced security click indicator to provide positive indication whether the enclosure is locked or unlocked. Self positioning flat locking rods provide smooth opening and closing. Double door models feature a locking system fitted to the slave door as standard. Standard zamak lift handle is finished in either RAL 5013 (mild steel models) or chrome (stainless steel models).
Material (mounting plate):	Galvanised steel, 3mm
Ingress protection:	IP55 or IP66 (model dependant)
Impact resistance:	IK10 (20 Joules)

Example of an EKSS enclosure built by an internationally recognised provider of value engineered automation solutions for the food and beverage sector.

NHP's customised solution manufacturing capabilities

Value-add

NHP is renowned in the electrical industry for our manufacturing capability – a sentiment that clearly reflects the market’s increasing demand for ‘value-added’ products and solutions. In saying this, understanding what value means to different customers and projects isn’t as simple as it sounds and this is where being local makes all the difference. With a local presence across the length and breadth of Australia and New Zealand our customers recognise that when we say we understand their needs, we really mean it.

Skilled personnel

Combining the strength of our quality product portfolio with highly skilled personnel, we take the time to understand your manufacturing requirements to ensure we deliver maximum project success. It is this ability to understand local and international markets and their relevant standards and compliance requirements that apply to each that allows us to better serve your needs with tailored manufactured solutions.

National Manufacturing and Distribution Centre

Our National Manufacturing and Distribution Centre in Laverton, Victoria, highlights NHP’s commitment to local manufacturing and expertise. At this state-of-the-art facility, our expert team brings together a range of manufacturing solutions under one roof, enabling us to provide you with what you want, when you want it. With interactive tours of the manufacturing and distribution facility available, visitors are able to view and experience the cutting edge technology and quality product that is brought to life at the facility. Please note that tours are available by appointment only.

Why NHP?

While our customers’ challenges may be complex, their ultimate goal is simple - run a profitable, safe and sustainable operation.

NHP is committed to servicing the needs of our customers. With more than 50 years of experience in the electrical and engineering industry, our specialist teams work collaboratively to design and deliver solutions to maximise the success of your project.

We bring together internationally recognised automation, motor control and power distribution products with local knowledge and expertise to deliver best practice services from concept design through to installation and after-sales service, including project management.

A partnership with NHP will provide you with:

24/7/365
emergency service

Extensive local
stockholding

Service network throughout
Australia and New Zealand

NHP project
management

Customised
manufactured solutions

Extensively trained and
qualified service technicians
