- Designed for ease of wiring, secure connections and durability
- Comprehensive range, offering a wide array of terminal types for most circuits and functions
- Terminals accommodate a full range of wire sizes from 0.5 to 70mm² wire cross section
- Cone shaped guide allows easy wire insertion
- Specialty terminals including two-level, grounding, diode, isolating, fuse, sensor and thermocouple terminals
- International approvals, UL recognized, IEC and CSA certified.

The V7 range of Sprecher + Schuh terminals are designed to meet the three most important criteria when selecting a terminal block line - ease of wiring, secure connections and durability. The V7 range is a comprehensive array of terminal types for most circuits and functions from control to low level power. Aside from the broad selection of standard feed-through terminals many special terminals can be offered: - Two level terminals - Ground terminals - Dual connection terminals - Diode terminals - Plug-in style terminals - Various isolating terminals - Fuse terminals - Sensor terminals

Through Terminals

Available from 2.5 to 70mm², Sprecher + Schuh through terminals provide the simplest method of connecting one pair of conductors. Sold as single units.

Custom terminal marker cards can be printed horizontally or vertically.
Refer to the NHP pricelists for blank terminal marker Cat No. and the number of rows and columns per marker card.

 **Allen-Bradley** 1492-MXxx, 1492-SMXxx

 **sprecher+schuh** V7-SMXxx, V7-MPxx, V7-MP5xx

Vertical orientation

Horizontal orientation

Custom marker card details:

CAT NO.	REPEAT SEQUENCE	ORIENTATION	QUANTITY	WHAT TO PRINT
V7-SM6x12	Yes	Vertical	4	Example 1-50

Note 1
Refer to the NHP pricelists for the relevant terminal marker card Cat No.

Note 2
Repeat sequence refers to repeating the sequence of numbers that are to be printed.
For example where there are multiple terminal rails with similar numbering then the sequence of numbers (e.g: 1 to 14) can be repeated until the number card is filled up.

Note 3
Vertical or Horizontal
Orientation of how the text will appear with respect to the terminal. Refer to the above diagram.

Note 4
Number of terminal marker cards required.

Note 5
Refer to NHP pricelists for the quantity of marker tags per card.
For custom text, a table of the marker card can be drawn with the custom text marked out. Generally 2 digits can be printed on the cards horizontally and 3 digits vertically. If more digits are required then please consult with NHP.
