

440KB04026

Allen-Bradley 440K Centurion Guardlock Switch 2NC Safety
1NO Auxiliaty Left Bolt Alloy Red M20

Component type	
Range	440K Centurion
Model	N/A
Product status	Existing

The Allen-Bradley 440K Centurion GuardLocking Switches are ideal for use on simple machines with short, constant run-down times. Featuring positive mode thumbwheel operation interlocking switches that lock the guard closed until it is manually rotated, retracting the shaft from the guard door therefore isolating power.
