

RL24I

REMLIVE Live Line Indicator Monitoring Base Unit with Display
24 to 690V AC and 24 to 1000V DC

| | |
|-----------------------|----------------------------------------|
| Component type | Indicator light for distribution board |
| Range | RL24IC |
| Model | N/A |
| Product status | Discontinued |

The Remlive electrical safety live line indicators provide visual indication of a live circuit, minimising risk of accidents and pinpointing faults. Capable of detecting dangerous voltage levels via LED on/off lights and available in a wide voltage range with IP66 rating.
