SIGNAL CONVERTERS

Allen-Bradley

Component type	Accessories/spare parts for sensor technology
Range	Signal Converter
Model	N/A
Product status	Existing

The Allen-Bradley Signal Converters provide a full range of options to isolate, convert, split, linearize and amplify a broad range of signal types. Assisting to protect expensive control systems from transients and noise while eliminating ground loop/noise-induced errors in process measurements through galvanic isolation, boosting accuracy, response time and power dissipation.
