| Component type | PLC system power supply |
| Range | ControlLogix 1756 |
| Model | N/A |
| Product status | Existing |

The Allen-Bradley 1756 ControlLogix® controllers provide a robust and scalable control solution for industrial automation systems. Logix programmable automation controllers use a standard control engine with a standard development environment to provide high performance in an easy-to-use environment. The system provides discrete drives, motion, process, safety control, communication, and state-of-the-art I/O in a small, cost-effective package. The modular arrangement allows for efficient design, build, and modification. Available with On-Machine models suitable for process, motion, discrete, and high-availability applications.

ELECTRICAL

| | |
|--|---------|
| Input voltage at DC | 18-32 V |
| Type of voltage (input voltage) | DC |
| Type of output voltage | DC |
| Power output | 75 W |
| Redundancy | No |
| Max. output current DC | 13 A |

ENVIRONMENT

| | |
|------------------------------|-----------|
| Operating temperature | -20,70 °C |
|------------------------------|-----------|
