Allen-Bradley ControlLogix Safety Energy Storage Module No Stored Energy

KEY EXCHANGE INTERLOCKS

Component type	PLC system power supply
Range	440T Time-delay
Model	N/A
Product status	Existing

The Allen-Bradley 440T Electronic Timed-delay Unit Trapped Key Interlock Switches are ideal for applications requiring an elapsed time to occur before access to a hazardous area. A combination of Guardmaster® SI and EMD safety relays execute the timing sequence by turning a non-removable key, when the EMD times out an internal solenoid is energised allowing the removal of the trapped keys.

ELECTRICAL	Type of output voltage	DC
	Redundancy	No
	Max. output current DC	3 A
ENVIRONMENT	Operating temperature	-20…70 °C
