1769PB4

Allen-Bradley CompactLogix 1769 4A Power Supply 24V DC

MID-RANGE CONTROL SYSTEMS

Component type	PLC system power supply
Range	CompactLogix 1769
Model	N/A
Product status	Existing

The Allen-Bradley CompactLogix 1769 programmable controllers are designed to provide a cost-effective, compact control solution for small to medium-sized applications. Includes integrated safety and adoption of the same programming software, network protocol and information capabilities included in all Logix controllers.

ELECTRICAL	**Input voltage at DC**	19.2-31.2 V
	Type of voltage (input voltage)	DC
	Type of output voltage	DC
	Power output	75 W
	Redundancy	No
	Max. output current DC	4 A
ENVIRONMENT	**Operating temperature**	0…60 °C
