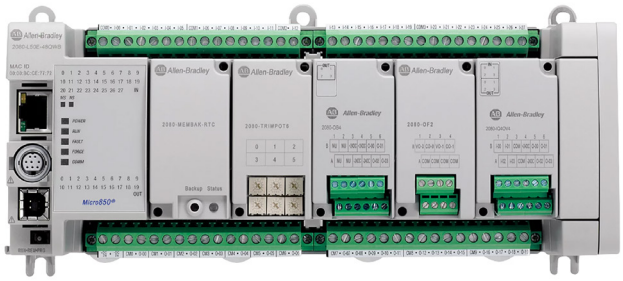
Allen-Bradley Micro850 Controller 28DI 20DO Source Ethernet RS232/485 24VDC

MICRO CONTROL SYSTEMS



Component type	PLC CPU-module
Range	Micro 800
Model	850
Product status	Existing

Allen-Bradley Micro800 controllers offer both a scalable and robust micro control solution for small to large standalone applications and allow for customisation and flexibility. You can elect from a wide range of plug-in modules to match your requirements and make use of Connected Components Workbench™ software to help reduce machine design time and maximise productivity.

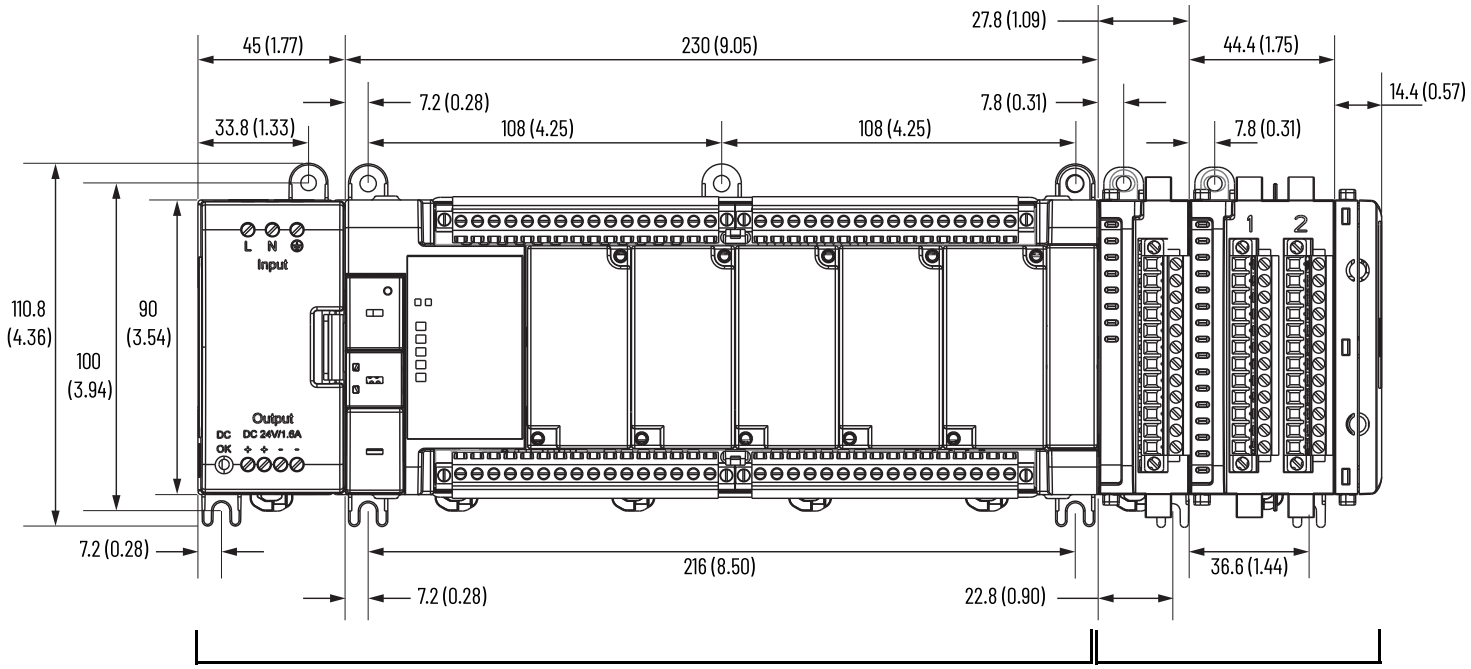
DIMENSIONAL DIAGRAM

Micro830 and Micro850 48-point Controllers (Front)

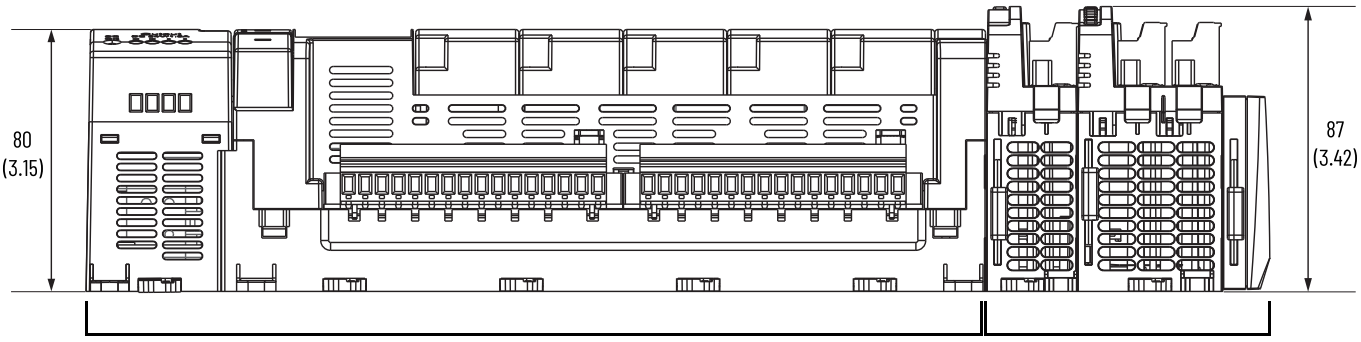


Micro830/Micro850 48-pt controller with Micro800 power supply

Expansion I/O slots
(Applicable to Micro850 only)
Single-width (first slot)
Double-width (second slot)
2085-ECR (terminator)

Measurements in mm (in.)

Micro830 and Micro850 48-point Controllers (Side)



Micro830/Micro850 48-pt controller with Micro800 power supply

Expansion I/O Slots
(Applicable to Micro850 only)
Single-width (first slot)
Double-width (second slot)
2085-ECR (terminator)
