

CLH3

Carlo Gavazzi Level Sensor Level Probe 3 Electrode No Isolation 1000mm

Component type	Conductivity sensor
Range	Level Sensor
Model	N/A
Product status	Existing

The Carlo Gavazzi Level Sensors are designed to detect conductive and non-conductive liquids, granulates, grains and plastics in both on/off control or continuous monitoring functions. Ideal for applications requiring level control in wells, municipal water systems, protection of pumps, grain elevators, feed conveyors and vacuum delivery systems in the plastics industry.

ELECTRICAL	Type of electric connection	Circular connector
	Material process connection	Stainless steel 316 L (1.4435)
	Cell constant	0.01
CONSTRUCTION	Model	Conductive
	Material electrode	Stainless steel 316 L (1.4435)
	Degree of protection (IP)	IP68
	Sensor type	Other
	Type of process connection	G 1/2 inch
MECHANICAL	Elbow plug	No
	Insert length	0 mm
	Max. pressure	5 bar
DIMENSIONS	Cable length	0 m
	Thread size	38.1 mm
ENVIRONMENT	Max. temperature	90 °C
	Max. ambient temperature	90 °C
