2085OF4

Allen-Bradley Micro850 Expansion Module 4-Point Analogue Output Bipolar +-10VDC/+-20mA

MICRO CONTROL SYSTEMS

Component type	Fieldbus, decentr. periphery - analogue/digital I/O module
Range	Micro 800
Model	850
Product status	Existing

Allen-Bradley Micro800 controllers offer both a scalable and robust micro control solution for small to large standalone applications and allow for customisation and flexibility. You can elect from a wide range of plug-in modules to match your requirements and make use of Connected Components Workbench™ software to help reduce machine design time and maximise productivity.
