FLB3202N

Ewon Flexy Remote Access Card B 3G Pentaband Modem

ELECTRICAL ENGINEERING PRODUCTS

Component type	
Range	Flexy
Model	N/A
Alternative	FLB3209

The eWon Flexy is a multipurpose internet data gateway that has been designed to enable remote monitoring and predictive maintenance thanks to the Talk2M VPN industrial cloud service. It is the perfect option for machine builders after a cost effective, secure data acquisition and logging solution where routing capability is not required.
